FY26 Q2 Financial Highlights

Cash Returned to Shareholders

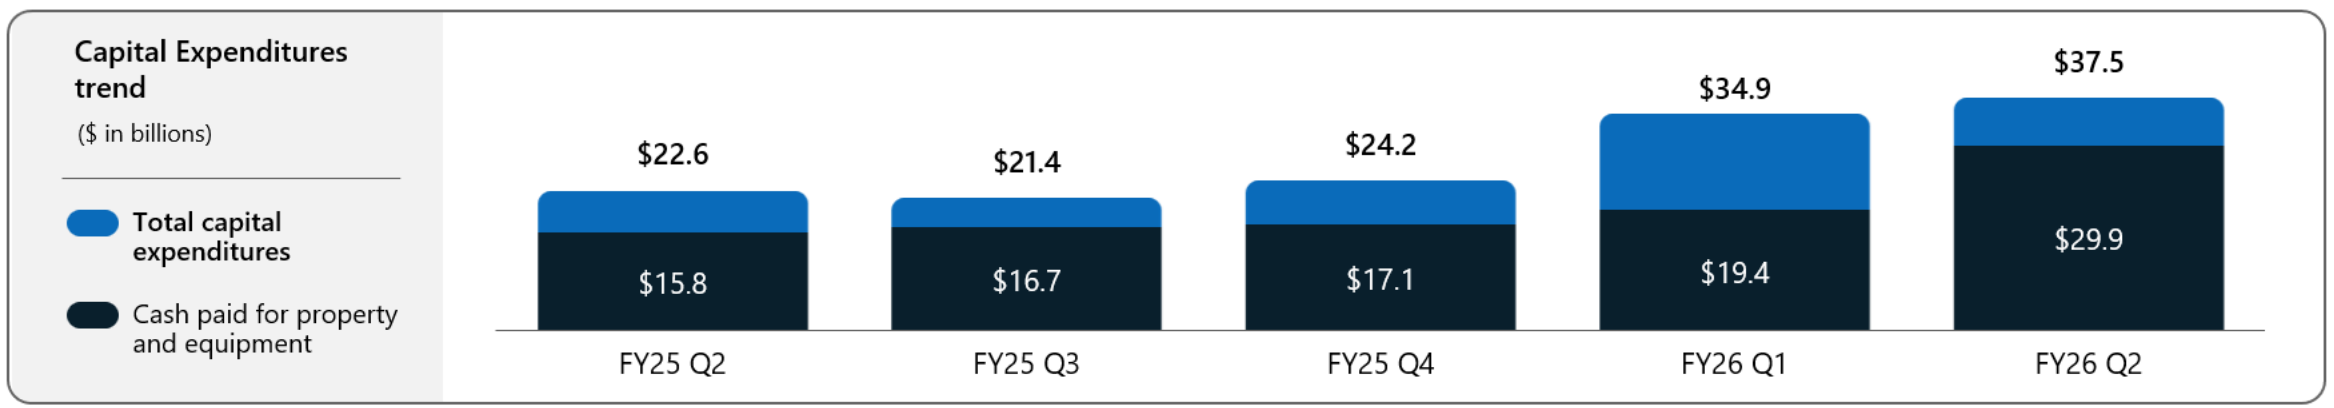

- Returned $12.7 billion to shareholders, up 32%, with $6.8 billion in dividends and $6.0 billion in share repurchases

Capital Expenditures

- Capital expenditures including assets acquired under finance leases were $37.5 billion, up 66% to support customer demand for our cloud and AI offerings. Roughly two-thirds of capital expenditures were for short-lived assets, primarily GPUs and CPUs, which support Azure platform demand, growing first-party applications and AI solutions, accelerating research and development by our product teams, as well as continued replacement for end-of-life server and networking equipment.
- The remainder of capital expenditures were for long-lived assets which will support monetization over the next 15-year period and beyond. Finance leases, which are primarily for large datacenter sites, were $6.7B and are recognized at the time of lease commencement.
- Cash paid for property and equipment was $29.9 billion, up 89%, lower than capital expenditures primarily due to finance leases

Cash Flow

- Cash flow from operations was $35.8 billion, up 60% driven by strong cloud billings and collections
- Free cash flow was $5.9 billion, down 9%, reflecting higher capital expenditures to support our cloud and AI offerings

Includes non-GAAP constant currency ("CC") growth and free cash flow. See Appendix for reconciliation of GAAP and non-GAAP measures.
Growth rates in GAAP and CC are equivalent unless otherwise noted.
